## Copper Strip Technical Data Sheet

### General Description

Copper strips are produced from >99% pure electrolytic copper and are used for electrical, mechanical, and earthing applications. These strips offer high conductivity, excellent formability, and corrosion resistance. Supplied in straight lengths/coils.

### Product Specifications

Parameter	Copper Strip
Width	10-200 mm
Thickness	1-50 mm
Purity	>99% Cu
Weight per Meter	Varies
Surface Condition	Bright Annealed
Standard	IS:1897 / EN 1652
Min. Conductivity	79% IACS
Price	ON REQUEST
